the β -phase of the polymer. The β -phase is the more ordered phase and is characterized by a higher density and a higher melting point than the α -phase. The β -phase is also the more stable phase and is the one that is most commonly observed in nature. The α -phase is the less ordered phase and is characterized by a lower density and a lower melting point than the β -phase. The α -phase is also the less stable phase and is the one that is most commonly observed in nature.
